OUR FLEET MANAGEMENT SERVICES

Fuel Management

Fuel monitoring system significantly provides valuable insights into fuel usage, drainage, and refilling.

Temperature Monitoring

Transfer your temperature-sensitive cargo at a safe temperature with temperature monitoring system.

Driver Monitoring

Improve driver safety, reduce fuel consumption, and maintain overall fleet performance.

Load Monitoring

Improve driver safety, reduce fuel consumption, and maintain overall fleet performance.

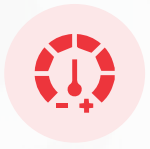

Video Monitoring

Reduce business ineffciencies, zoom into critical issues, and respond proactively with video telematics.

E-Locks

Reduce business ineffciencies, zoom into critical issues, and respond proactively with video telematics.

Route Optimization

Automate planning and schedul-ing of feet routes to improve effciency, reduce costs, and enhance customer satisfaction.

Vehicle Health Monitoring

Our advanced vehicle health monitoring system empowers feet owners to self-diagnose and report on vehicle health.

Expense Management

Track expenses, analyze proft trends, break down operational costs, and increase ROIs with our expense management system.

INDUSTRIES WE SERVE

Healthcare

- Mobile Medical Units
- Healthcare Equipment
- Emergency Fleets
- Ambulance Services
- Pharma Fleets

Trucking

- Logistics
- IFTA
- Delivery Vehicles
- Consignment Tracking

Agriculture

- Agricultural Operations
- Dairy Product Distribution
- PTO and RPM hours

VIDEO TELEMATICS

Adding video telematics to your fleet management system will forever change the way your clients track and monitor their fleet. Get a solution to experience beyond tracking!

Keep an Eye on your Fleet and Protect your Business

- Detect Incidents in Real-time
- Prevent Liability Risk
- Protect Vehicle Cargo & Drivers

Live Streaming

Provide your clients with real-time access to high-quality video footage of the vehicle with multiple camera views.

Key Benefits

- Get evidence in case of accident or theft
- Understand & improve the driving culture
- Stay ahead of regulatory & insurance requirements
- Increase road safety in real-time

Maximize Your Fleet Safety with Video Telematics

ADAS alerts for on-road events, such as forward collisions, tailgating & more

DMS alerts for in-cab incidents, such as distracted or drowsy driving & more

Driver Scorecards to Rank, Reward & Coach Drivers

Get a quick review of important events of ADAS and DMS.

Video telematics can be certainly useful in easy claim settlements

Get instant insights into video recordings anywhere

MOTOR BIKE TRACKING

Guarantee the safety and efficiency of your motorbikes with Autonemo advanced tracking solutions.

GPS tracking solutions for Motorbikes across all industries

Our motorbike tracking solutions allow customers to track their bikes live 24 hours a day. This allows personal customers to monitor their bikes closely using the geo-fence and motion alert features as well as for business customers to keep track of their staff and give their clients more accurate ETAs which puts them ahead of the competition.

Industries that benefit from motorbike tracking

Emergency Services

Couriers

Motorcycle Instructors

Motorsport

Key Benefits of Motorbike Tracking

- Real time tracking
- Spend less
- Route optimisation
- Recovery from theft
- Improved utilisation
- Peace of mind

VEHICLE MANAGEMENT SYSTEM

Manage your Transport business with our Vehicle management system

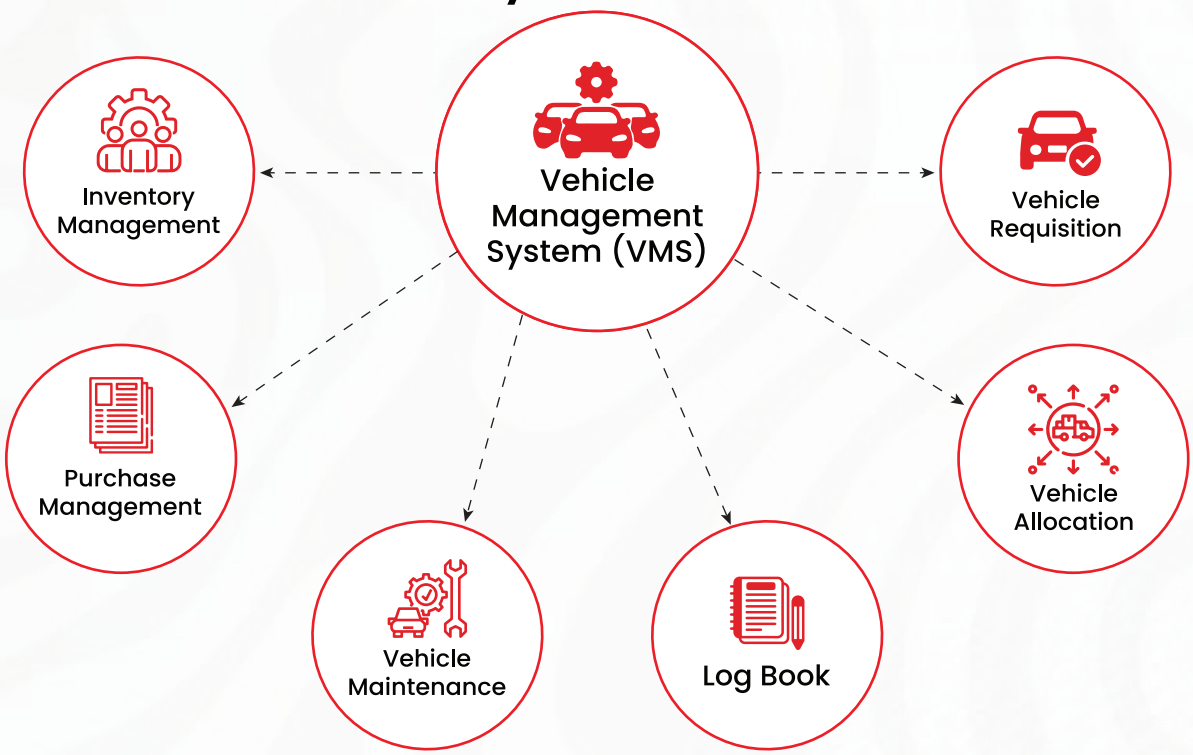

A Complete Vehicle Management System

VMS – Vehicle Management System is the complete Fleet Management System for managing vehicle management if you want to manage your small or large vehicle business.

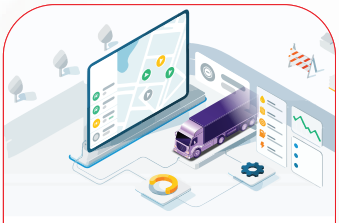

- Unlimited vehicle add system
- Driver and Trip Management System
- Business Accounting System added
- Easy Reporting System
- Income and Expense Report
- Vehicle fitness and fuel tracking
- Vehicle registration system
- Vehicle requisition system

Key Features

VEHICLE HEALTH **MONITORING**

Predict your vehicle health with our advanced technology

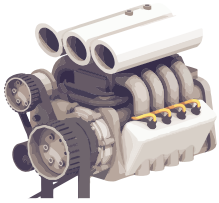

Prognostics

Detection of Engine failure in advance

Driver Safety

Immediate alerts in case of improper driving

Engine & Vehicle Health

Monitoring early warning signs to improve Vehicle's uptime

Fleet Analytics

Recommendations on operational parameters to increase overall vehicle efficiency

Features of Vehicle Health Monitoring System

Signs of Hard Braking

Our technology shows the signs of aggressive driving

Updates on Hard Acceleration

Helps to reduce engine wear and tear problems

Check for Over Speeding

Helps to reduce engine wear and tear problems

Evaluate Engine Idling

Increases Fuel Efficiency for every trip

Analyze Gear Usage

Maintains the life of the vehicle with good efficiency

Monitor Average Speed

Considering the safety of the driver and vehicle average speed is to be maintained

Fuel Level Monitor

Monitor the live fuel level, fuel consumption and mileage reports for effective fuel management

Calculate Brake Instance

Extends brake life by calculating the number of brakes applied for every journey

SCHOOL BUS **MANAGEMENT**

Challenges

One of the major challenges faced by school bus management was ensuring the safety of students during transportation. As school bus drivers often have to deal with heavy traffic, narrow roads, and unpredictable weather conditions, which increased the risk of accidents.

Solution

The implementation of driving behavior monitoring system helped the school bus management to address these challenges.

Key Benefits

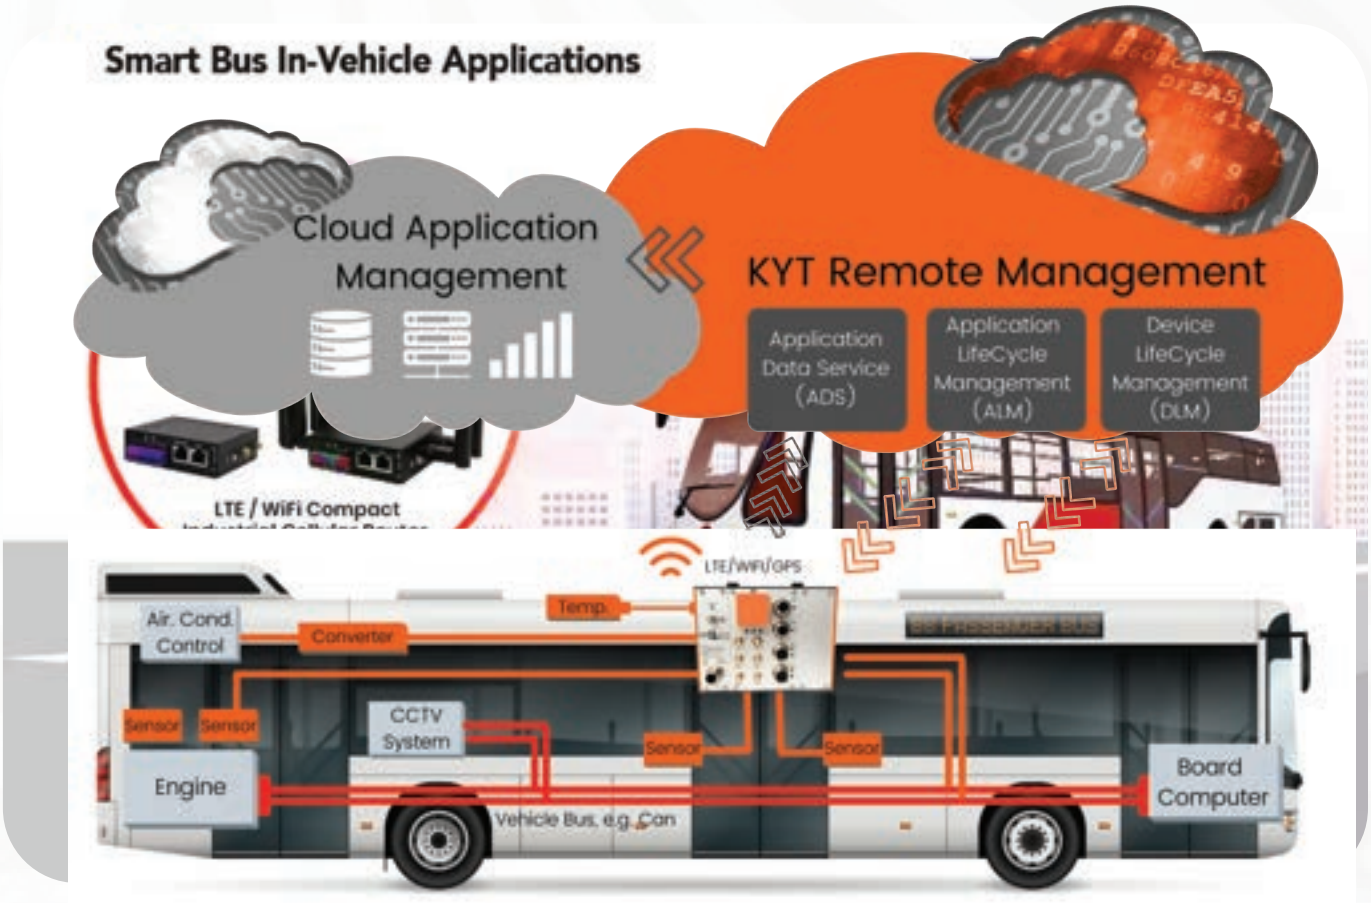

- Enhanced Student Safety
- Optimized Route Planning and Fuel Efficiency
- Cost-Effective and Resourceful
- Improved Communication and Transparency
- Real-time Communication and Parent Engagement

PUBLIC TRANSPORT MANAGEMENT

A public transport management system that comprises the core functionality of satellite tracking software and specialized tools designed for route management.

How Autonemo public transport management system works

1. Add or import stops
2. Create routes, add schedules, and bind units
3. Plan future rides
4. Track unit movements in real time
5. Generate detailed reports

Functionality of the route management system

- Handling stops
- Route management
- Rides
- Online tracking

DRIVER BEHAVIOUR MANAGEMENT SYSTEM

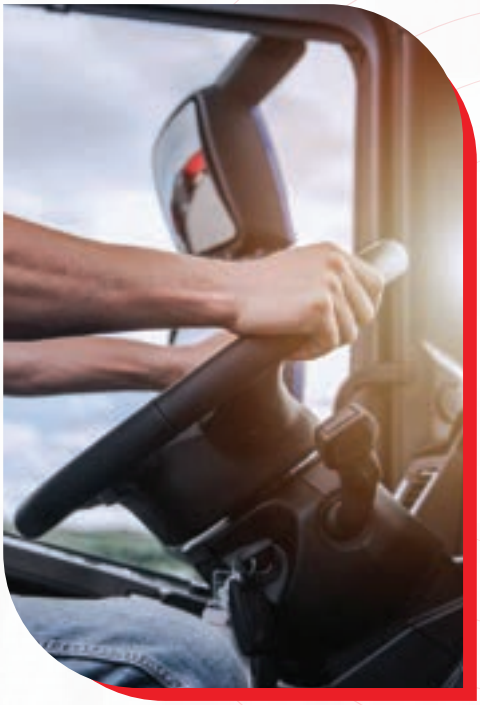

Maximize operational efficiency and ensure driver accountability with advanced driver management system

Benefits of Calculationg Driver's Score

ADVANTAGES OF DRIVER MANAGEMENT WITH AUTONEMO

- Know who is driving
- Improve driver behavior
- Reduce fuel consumption
- Secure personnel
- Evaluate driver efficiency

ASSET TRACKING

Autonemo offers battery-powered asset trackers that provide periodic location reports ensuring efficient and secure monitoring of objects.

Key Benefits

- Periodic location reports
- On-time construction projects
- Tamper detection
- Efficient recovery
- Configurable reporting
- Easy installation

E-LOCK

Keeping your goods safe should be a cakewalk—only if you have elocks. Best organizations prioritize safety because they know that safety is not just a slogan on the wall but a habit. Safety is how you can minimize your losses.

Prevent Unauthorised Access of High-Value Cargo Remotely

- Trackable In Low-Network Regions
- Get Lock/Unlock Log Reports
- Access Cargo With Digital Codes
- Instant E-Lock Tamper Alerts

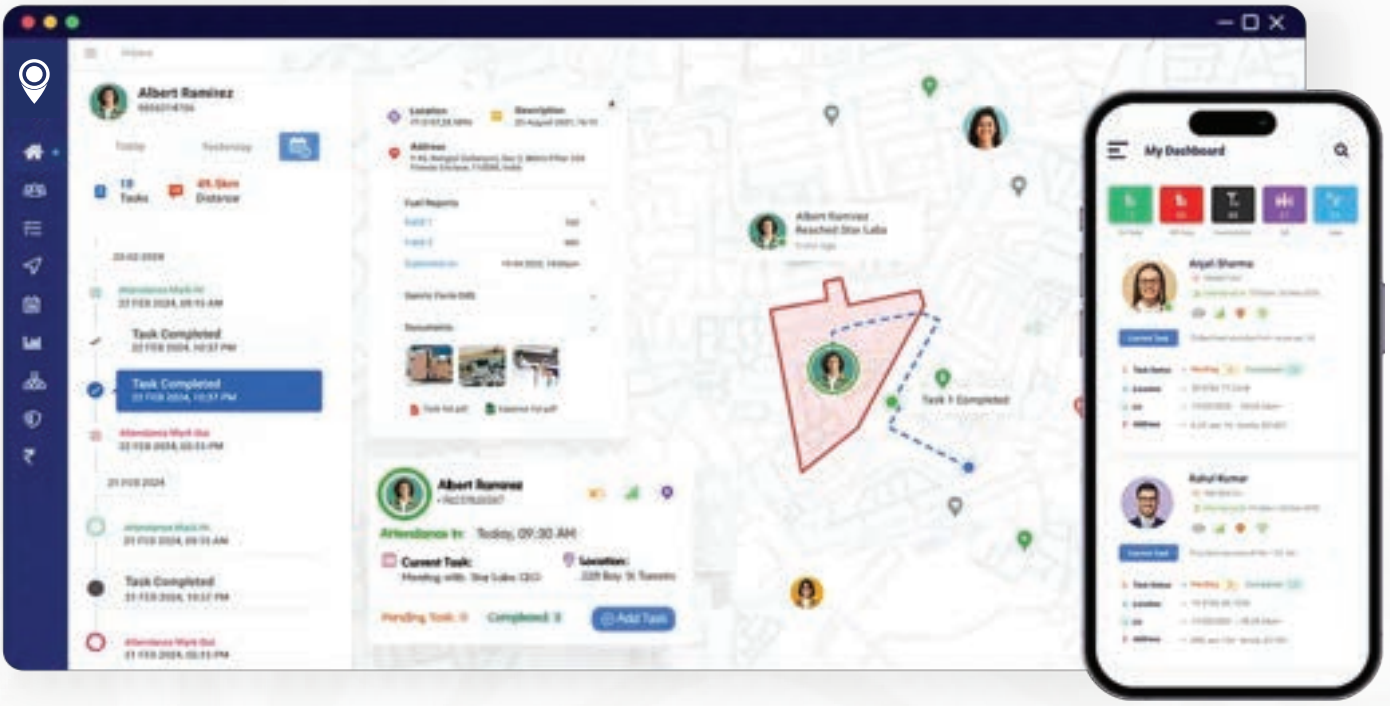

E-Lock	100%
Motor Fault	17 mins
Violations	8
Tamper	2
Wrong Password Attempt	3
Unauthorized RFID Attempt	0
Open back cap Attempt	2
Steel pipe cut Attempt	0

- Lock/Unlock Remotely
- Get Real-time Alerts
- Create Geofencing
- In-built GPS Tracking

FIELD FORCE TRACKING SYSTEM

Bring your end-to-end field operations under one umbrella with the help of Field Employee Tracking System.

ADVANTAGES OF FIELD EMPLOYEE MANAGEMENT

- Track Remote Staff Location
- Attendance and Leave Tracking
- Assign & Track Tasks
- Employee Expense Management
- Order Management Tool

LOAD MONITORING

Make your vehicle fleet more efficient reducing maintenance costs

Benefits from LOAD MONITORING SYSTEM

- Avoiding losses caused by fines for exceeding axle load
- Instant notifications on exceeding axle load limit
- Optimization of cargo load, increasing profitability of fleet
- Reducing truck maintenance costs and excluding extra costs for early repair
- Remote diagnostics of vehicles with air suspension system

LIVESTOCK **MANAGEMENT**

You can already know where and how your livestock is anywhere. With Digitanimal, you can track the past displacements of your livestock.

GLOBAL CONNECTIVITY

RUGGED & WEATHERPROOF

FLEXIBLE CONFIGURATION

OFF THE SHELF BATTERIES

PERIODIC OR MOVEMENT-BASED

THEFT RECOVERY

ADVANCED GEOFENCING

SLEEP MODE

INACTIVITY DETECTION

CNG MONITORING IN VEHICLES

Monitoring of Compressed Natural Gas tanks with Fillings and Consumption.

Key Benefits

- Immediate update on any CNG filling with time, location and percentage
- Real-time tracking on Google Maps with satellite imaging
- No more fake CNG filling bills
- Accurate CNG consumption and engine running hours report
- Remote switching off facility

VESSEL TRACKING SYSTEM

We provide complete solution for tracking, fuel consumption and reporting for ships. Implementations have been done for both local and international vessels

VESSEL TRACKING & FUEL CONSUMPTION SYSTEM

Autonemo tracker introduced the 1st ever real-time fuel consumption monitoring & vessel tracking system in Bangladesh. Now you can track your vessel's speed, travelled distance, location address, geo fence position etc.

For effective vessel management, Autonemo provides several types of reports

- Vessel's current location
- Speed and travel Distance
- Fuel consumption on each trip
- Trip report
- Engine hours
- Performance report
- Geofence violation report
- Anchor duration and location
- Parking report
- Movement report on a monthly basis

HEAVY EQUIPMENT TRACKING

Log book and fuel monitoring for pay loaders, excavators, cranes etc.

HEAVY EQUIPMENT MONITORING SOLUTION

Autonemo Tracker's Heavy Equipment Tracking Solution will provide you with 24/7 security and monitoring. Using satellite GPS, you can see your equipment's movement, position, speed, and engine status on the map.

Key Benefits

- Equipment's working hours report
- Equipment's idle report
- Any shape of Geo-Fences
- Distance and nearest vehicles list
- Automated notification for maintenance and record
- Fleet-wide current location and movement status
